

Participate in an international scientific conference !!!

The Department of Humanities of the Tashkent institute of irrigation and agricultural mechanization engineers, in cooperation with the Department of the Middle Ages, University of Leida, Spain, is planning to hold an international scientific conference on the topic "The state of development of irrigation systems in the West and East in the Middle Ages and their practical significance today." The list of professors and teachers who will speak at this conference is being formed. We invite everyone to take an active part in this conference.
