

The peace begins with purity

As you have already mentioned, the administration of the Institute focuses on implementing significant work in the new system, in new directions, where the dormitory studied centrally, and the problem solved in coordination with the relevant departments. This time, the Vice-Rector for Youth Affairs and deans of all faculties focused on part of the third Student Dormitory.

The shortcomings and problems in the student's part's hostel of the faculty "Organization and management of water resources" studied and eliminated by the staff of the relevant department and dean of the faculty. In the vice-rector's office, all deans of faculty, deputy deans, professors and teachers, representatives of public organizations, staff members of the institute, responsible heads of departments visited all the exemplary rooms of the hostel. It is pleasant that the rooms have all the facilities. Even the fact that students take care of flowers on the windowsills is a sign of cleanliness. Sample rooms selected with diplomas and prizes presented to the students by the Vice-Rector for Youth Affairs. After that, we saw the rooms, summed up the results, and invited the students, who were planning to leave, immediately to cook a cup of tea.

Vice-Rector for Youth Affairs spoke about the systematic study of student dormitories and his views on the transition to the Student Council system on the example of Student Dormitory # 3. Follow-up students also plan to do the same with their campus. We would like to thank the Dean of the faculty and the active youth.
