

"New Uzbekistan - begins from the threshold of school, from the education system"

According to the roadmap for cooperation, to improve the quality of education and professional skills of teachers and provide methodological support a group of professors and teachers lead by the head of the department "Hydraulics and Hydroinformatics" of the faculty "Hydromelioration", Professor A. Arifjanov visited the secondary school No 56. The director of the school welcomed the teachers of the department of "Hydraulics and Hydroinformatics" and acquainted them with the conditions created for students at the school. After that, the professors of the Department of Hydraulics and Hydroinformatics organized a dialogue and an open lesson with 11th graders who are going to apply to the university this year.

In his report, the head of the department, Professor A. Arifjanov mentioned our President Shavkat Mirziyoyev's words: "As we have set the great goal to building the foundations of the Third Renaissance in our country, we need to create an environment and conditions that help to bring up new Kharezmi, Beruni, Ibn Sina, Ulugbek, Navoi and Baburs. First of all, it is necessary to develop education system, to establish healthy lifestyle, to develop science and innovation".

Associate Professor L. Samiev made a presentation on the activities of the gifted student clubs "Evrika" and "Hydroleaders", under the faculty, the digitization of water resources and applied technologies, established at the Department of Hydraulics and Hydroinformatics. At the end, all students were invited to the an excursion to the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers.
