

Practice is a source of innovative ideas

Teaching staff of the Department of Irrigation and Melioration and Exploitation of Irrigation and hydromeliorative Systems: prof. Matyakubov B.Sh., prof. Isaev S.Kh., Assoc. Botirov Sh.Ch., ass. Yulchiev D.G., Gadoev N.M., trainee researcher Malikov E.N. and 1st year master's student Usmanov M.R. visited the Sardoba district of the Syrdarya region. There was carried out works on the basis of an agreement on an innovative grant with the Ministry of Innovative Development of the Republic of Uzbekistan.

In particular, was chosen a field for the experiment, prepared a soil section and determined changes in the depth of the soil layer. Also, were made morphological descriptions and taken samples to determine the mechanical composition of the soil by the Kachinsky method.
