

## A seminar on teaching in the credit module system in the Bukhara branch of TIAME

On January 29, in the lecture hall 308 of the branch with the participation of professors and teachers of the branch was held a seminar on teaching in the credit module system. The seminar was opened by the Deputy Director for Educational Affairs K. Qurbonov, who introduced the credit-module system. It is a multifaceted and complex systemic process to carry it as a whole. He noted that the credit-module principle focuses on two main issues: ensuring the independence of students, providing opportunities to assess students' knowledge on the basis of ratings.

After that, the head of the educational department of the branch A.Niyazov delivered a report. A. Niyazov says that the main tasks of the credit-module system are the organization of educational processes on a modular basis, determining the value of a single subject, course (credit), assessment of students' knowledge on the basis of ratings, he noted that it is possible to create curricula on an individual basis, increase the convenience of educational programs and changes in the demand for specialists in the labor market.

At the end of the seminar professors and teachers received answer to their questions. In short, the system is focused on the professional development and maturity of the student. It is aimed at ensuring the lifelong learning of the scientist and the formation of human capital that can meet the requirements of the labor market and modernity.
