

Exchange of experience and mutual cooperation with related universities

Exchange of experience and mutual cooperation with related universities On the initiative of the rector of the institute, Professor U.P. Umurzakov, on February 28, 2020, the faculty of the Department of Hydraulics and Hydroinformatics of the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers visited the Tashkent Institute of Railway Engineers to familiarize themselves with the activities of the department of engineering communications and systems. In the course of studying the activities of the department, they also get acquaintance with the Hydraulics laboratory created at the department, with a dynamic pump brought from the Russian Federation, with modern equipment for studying filtration and cavitation processes, and the procedure for their operation. They talked about the work carried out at the department, shared their achievements and plans for the future, and also exchanged experiences with the faculty. <http://tiiame.uz//storage/web/source/1/oW3QTjTC9DPTLftPkOPB8qC2OfQVVBv2.jpg> During this process, the departments agreed to cooperate in improving curricula and programs, developing industry projects and their implementation. This exchange of experience will help teachers evaluate their effectiveness, develop plans for the future and contribute to the development of healthy competition in science and education.
