

The Continuation of Scholarly Research

In order to complete the tasks, planned within research activities for 2021, a business agreement № 15 /2021 "Improvement of the technical parameters of the existing collection and drainage networks, taking into account the soil conditions of irrigated lands with the introduction of water-saving technologies" with the Big Fergana Main Canal By Order of B. Mirzaev, dated October 27, 2021 № 89, a group of professors and doctoral students, that were participated in the project, returned from a business trip to the Fergana region of our country. 

During the visit, the Fergana Global Textile Cluster and 21st Century Harvest farms, which are leading in the implementation of water-saving technologies in the region, conducted studies to assess changes in the current growing season.
