

Activeness as the basis for selflessness

Increasing and supporting student participation in spiritual and educational activities is always a topical issue. This increases the activity of students, and strengthens their intellectual potential as well. At the event held in the 4th dormitory of our institute R. Choriev, Vice-Rector for Youth Affairs, communicated with the students living in the dormitory about this issue. At the same time, students also expressed their opinion on events, reading books and sports.
