

## The Commonwealth Continues

On April 2, 2021, at the initiative of the Department of Exploitation of Irrigation and drainage systems, one of the leading scientists of the People's Republic of China Li Guo Dong and a young scientist from Uzbekistan Makhmudov Bekzodbek organized a lecture on the topic "Chinese cotton, water-saving technologies and intelligent systems."

The report provided information on the current agricultural data in China, in particular that the usage of the latest technologies related to cotton cultivation can achieve yields of 50-90 centners of cotton. They started working for "Tiancheng" company, in order to apply their experience in Uzbekistan.

The company "Tiancheng" has gained an agreement with the Department of Exploitation of Irrigation and drainage systems to conduct training sessions on 140 hectares of land in Syrdarya region using modern water-saving technologies. The lecture was held in a dialogue format.
