

## Collaboration between institute and school

According to the Roadmap developed in cooperation with secondary schools under the department of public education of Orta Chirchik district of Tashkent region, for improving the quality of education and methodological support of teachers teachers of the Department of "Electricity and Renewable Energy Sources" visited the school No.41 in Orta Chirchik district of Tashkent region on January 16th.

During the visit, the head of the department D. Kadyrov gave advice to the teaching staff of the school on improving the quality of education and professionalism of teachers. Also, in order to guide high school students to the profession, the assistant of the department A.Davirov and the doctoral student of the department N.Abduganiev provided information about the bachelor's and master's specialties available at our institute. At the end of the event, school teachers and high school students received answers to their questions.
