

The phenomenal project has started

"Improvement of Agricultural Engineer Training Programs by Introducing Innovative Solutions in Foreign Universities" project has started its work.

The above mentioned project of the Academic Innovation Fund within the "Modernization of Higher Education" project of the Ministry of Higher and Secondary Special Education of the Republic of Uzbekistan started its work at the Department of Tractors and Automation of the Faculty of Mechanization of Agriculture. \$ 140000 is provided for the project, and it will last for 2 years.

The project aims at improving the current curriculum and science curricula of Agricultural Mechanization Education, introducing new subjects into the curriculum; Promoting innovative technology and technology in agriculture through the introduction of innovative solutions used in foreign universities, support the new training curriculum; Promote the capacity of teaching staff and improve the quality of their work; and to intensify the role and participation of students in the learning process.

In achieving these goals, the project works with the University of California, Oklahoma and Mississippi in Davis, USA and South Korea's Seoul National University.

The project will include a modern computer classroom with Internet access, which will provide faculty with three-level English language courses and workshops for new courses with foreign partners, and purchase laboratory equipment.

Professors and teachers interested in cooperation with the project can apply to the Department of Tractors and Automobiles.

Report by M.Amonov, the head of the department of Tractors and Automobiles
