It should be mentioned that strengthening and development of the state depends on the formation of a new government and a new generation. The head of state is concerned about the uniqueness and shortage of modern personnel in our country, the need for young professionals, who think creatively and possess advanced technologies. It is impossible to imagine the future of society without educated, competitive and most importantly - fluent speakers, as well as teachers and young professionals, who speak foreign languages. 

These issues are discussed in the article by the Academician Mirziyod Mirsaidov "Educated youth - builders of the third Renaissance", published on November, 2021, "New Uzbekistan" newspaper. The author of the article noted that "All young people contribute to the formation of a new Uzbekistan, if they are committed to solving problems in their field with the help of science".
