

## international scientific conference on Construction Mechanics, Hydraulics and Water Resources Engineering (CONMECHYDRO-2021)”

On April 1-2 of this year in Tashkent Institute of Irrigation and Agricultural Mechanization engineers together with Peter the Great St. Petersburg Polytechnic University, Tashkent State Transport University, Karshi Institute of Economics and Engineering, Kazakh-German University and JSC "Gidroproekt" will conduct a seminar "Construction Mechanics, Hydraulics and Water Resources Engineering (CONMECHYDRO-2021)".

Leading scientists, doctoral candidates and young researchers from the USA, France, Japan, Hungary, Germany, Canada, Iran, China and South Korea in the field of environmental hydropower, hydraulic structures, building materials and structures, hydraulic engineering, mechanization and electrification of agriculture, renewable energy sources, materials science, intelligent transport systems and transport logistics participated in the conference:

Ecology, hydropower and modeling of physical processes.

2. Road construction, building structures and materials.
3. Hydraulics of structures, hydraulic engineering and land reclamation construction.
4. Mechanization, electrification of agriculture and renewable energy sources.
5. Engineering Materials Science, Intelligent Transportation Systems and Transportation Logistics (Engineering Materials, Intelligent Transportation Systems and Transportation Logistics).

Of the 420 papers presented at the conference, 146 were contributed by scientists and researchers from the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers.
