

## Dedicated to Ecology Day

Khashar is one of the ancient and unchanging traditions of our people. Its essence is a combination of prosperity, kindness and solidarity. Collectivism is inherent in the Uzbek national character. Therefore, khashar is invariably not only the joint carrying out of public works to restore order, but also combines reverence for folk traditions and maintaining them from age to age.

Departments of Electrical Engineering and Electrical Equipment, Electronics and Mechatronics, Power Supply and Renewable Energy, Automation and Management of technological processes and industries of the Faculty of Energy and Water Management on April 3, 2021 on the Day of Ecology in the institute together with teachers and students of the department carried out landscaping work and planting the area.
