

## Visiting schools

Students of the 307th group of the "Innovative technologies and their use in the water sector" educational direction of the Hydromelioration Faculty under the guidance of the group supervisor Sanobar Dustnazarova conduct interesting open lessons for teachers and graduate students of Tashkent and Tashkent province schools.

Students of the innovation group Azizbek Hasanov and Jahongir Mukhtorov and their group supervisor Sanobar Dustnazarova visited Secondary School #45 located in Mughol village and Secondary School #11 located in Novka village in Bakhmal district of Jizzak Province. They provided school students with information about the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers and showed them video clips and presentations. The presentations provided general information about the institute's activities, faculties and directions of education, opportunities created for students, subjects that need to be passed when entering the institute, as well as additional information about entrance scores for previous years.
