

## The cooperation of Makhalla with higher educational institution

Definitely, every nation can admit the future in the image of mature youth. For this reason, over the years of independence in our country there have been undertaken a number of measures in order to promote a healthy lifestyle among young generation for protecting them from various harmful influences and, ultimately, for educating them as harmoniously developed people in the society. In addition to state structures, a considerable contribution was made by public organizations, particularly by the Public Charitable Foundation "Makhalla", its territorial structures, about 10 thousand gatherings of citizens in our country. "If each leader can donate books from his personal library to the school library, it will be a good initiative and will have a positive impact on the education of our children through the development of reading skills," said Sh. Narbaev, dean of the faculty Land management. Deputy Dean of this faculty H. Eshova, Head of the State Cadastre Department K. Rakhmonov and Deputy Dean V. Akhmadaliev visited Asaka mahalla in M. Ulugbek region and presented precious Uzbek and world literature resources to the own library of mahalla, where books were donated. One of the actual tasks is to raise the spiritual world of our youth, to educate them in the spirit of national and universal values.

We know well that in the current challenging environment, there can be observed the threats of attacking to our national identity, alien to our ancient values, and growing selfish desire to capture their minds and hearts, require each of us to be more vigilant. The processes of globalization in the world, especially the ministries, departments and organizations responsible for the education of young people, parents, public activists, neighbors, teachers and trainers of educational institutions and the public bear a great responsibility. After all, today it is important to educate the first owners as patriotic, humane, perky, worthy heirs of our great ancestors.

Due to the Resolution of the Cabinet of Ministers dated June 19, 2012 "On measures for further development the interaction of family and self-government of citizens with the educational institutions in upbringing of a harmoniously developed generation." Indeed, the role of sport in the healthy and harmonious development of younger generation is invaluable. Therefore, in order to spend free time with young people in Asaka Mahalla on the basis of partner organizations in summer, it is planned to organize competitions "The future of our football", "Heroes of our quarter" and "We are intelligent families".
