

TV Show dedicated to the history of irrigation in Uzbekistan

On July 2, 2021 on TV channel "The history of Uzbekistan" with participation of faculty members, researchers and doctoral students of the department of "Humanities" chairman of TIAME was broadcasted program on "History of irrigation in Uzbekistan". Head of the Department Sh.M. Uljaeva, senior lecturer M.Khakimova, researcher R.Zafarzhonova, basic doctoral student M.Makhmudova shared her thoughts and scientific conclusions on the topic of origin and development of irrigation sphere in Uzbekistan in this program.

Uzbekistan also saw the emergence of civilizations in such arid regions of the ancient East as Egypt, Mesopotamia, ancient China, and ancient India. In the formation and development of distinctive civilizations in Uzbekistan, the attention paid to this area by arid regions, scientific and professional approaches to them served as important factors. The program disclosed features of irrigation systems development in our national history, as well as presented information about training work and scientific activities of our institute scientists.

He also spoke about the creation of the scientific-innovation laboratory "Research Center for the History of Irrigation in Uzbekistan" at the Department of Humanities at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers and its future prospects.
