

impressions from the exhibition

The team of the Institute's Youth Union takes an active part in the Innoporm exhibition at the Tashkent Expo Center. At the international exhibition "Big Industrial Week Uzbekistan" together with members of the Youth Council a group of students led by the chairman of the Council of Women of the Faculty "Mechanization of Agriculture" Holikova Nargiza and youth leader Jagitaliyeva Ruhshona. At the exhibition they got acquainted with the equipment of such leading enterprises as "Kirovets", "Klaas", "Rosselmash", "Russian helicopters" and got answers to their questions.

The participation of young people in the exhibition is certainly pleasing, and the improvement of the innovative environment in our country is based on the actions of young people, the aspirations of young people. The near future is hard to imagine without robots, nano-technologies, our youth must keep up with the times.
