

Young people are the builders of the future

It is known from the historical development of any country that the rapid development of a country, its achievements, and the well-being of its people depend on the level of attention given to education and the future of youth in that country. In this sense, the issue of youth in Uzbekistan is one of the priorities of state policy. All the necessary conditions are being created today in Uzbekistan for young people to achieve their goals. Youth issues are addressed at the level of state policy. "Tomorrow, the well-being of the planet, depends on what kind of people our children will grow up to be," the President of Uzbekistan said.

On the initiative of the teaching staff of the Department of Hydromelioration Systems Operation, Faculty of Hydromelioration, the 3rd year students of the 307th group of the "Innovative Technologies in Water Management and Use" specialty undergo practical training at the Uzbek-Chinese joint venture "PENG-SHENG", located in Syrdarya province. Management and staff of the company create all conditions for students to further consolidate the theoretical knowledge in practice. Under the guidance of Daulet Gulomov, intern-teacher of the Department of Irrigation and drainage systems operation, students get acquainted with the processes that take place in the use of innovative technologies for water resources management from production of drip irrigation system elements to their design and installation on the fields.
