

Our athletes

Today, there are created all the conditions for students to express their talents in order to spend their free time meaningfully, to expand their worldview and thinking of young people, to become harmoniously developed individuals and to find their place in society. Yesterday, the Federation of Trade Unions held sports competitions in many sports. The first-year students of the Faculty of Land Management in national wrestling also took part in the competition and achieved a number of successful results. We wish them the same success in their future endeavors.
