

## The students opportunities and conveniences

As you know, the administration of the institute has taken measures to centralize the study of student dormitories and to solve existing problems in cooperation with the relevant departments.

This time, the dean of all faculties, deputy deans, a group of professors and teachers, the leadership of the SD, representatives of the public organization led by the Vice-Rector for Youth Affairs visited Students' Dormitory 2 where live the students of "Energy Supply of Agriculture and water resources" faculty . They got acquainted with the opportunities and conveniences provided to students. The Example rooms were nominated and souvenirs were gifted.

The faculty and the SD staff were given instructions by the Vice-rector for Youth Affairs to improve the existing facilities. He was interested in the ongoing results of the work of the five important initiatives. We think that students also will respond positively. Practical work in this area will be continued by the management of the Institute. We ask to continue the visit of all department heads and teachers. Keep up, 4 more faculties and graduate students' department rooms will studied soon.
