

## The sun of a nation's spirituality

On February 9, 2021 Kumkurgan Agro-Industrial College will host an event dedicated to the 580th anniversary of the birth of Alisher Navoi, the great spiritualist and unique genius of the Uzbek people, who had a profound influence on human heart and mind. The spiritual and educational event was conducted by N. Bekkulova of Kumkurgan Agro-Industrial College of UTIBDO and the floor was given to the principal of the college A. Gapparov to congratulate the participants. To preserve our spirituality today, it is necessary that everyone living in this country understands himself, understands our ancient history and rich culture, the heritage of our great ancestors, think consciously and regardless of the rapidly changing realities of life. ❌ ❌

The first prerequisite for the event was the students' unique information, presentation and applause from the audience. During the event, students read samples of Alisher Navoi's literary and artistic heritage and ghazals, performed scenes based on Navoi's works and performed the Tanovar dance. The event, especially the Bahr-u-Bait and question-and-answer sessions, was very atmospheric. Navoi's legacy is Oman. To study it only on birthdays at certain hours and months is just a drop in the ocean. We should not stop studying Navoi's work every minute, every second.
