

## thankfulness

As everyone knows, Sevimli TV prepares and broadcasts a number of programmes and TV projects to inform the public about the scale of reforms in our country, stability in society, inter-ethnic harmony and strengthening the family. Students of the Faculty of Land Management also took part in the show. In the final episodes, the show seemed a little unfocused. When one gives thanks for the blessings in hand, one sees the blessings increase. Because of complaints and denials, the blessing in his hand is lost. God has bestowed incomparable blessings on His servants. The only requirement is to be thankful for these blessings.

The main character in this show is a girl who lost her legs in a car accident. Despite this, our students returned with a great experience, thanking God, learning the craft from where they sat, teaching the craft to others, and seeing the resilience of the girl who had produced a number of disciples.
