

my profession is my proud

On April 7, 2021 a round table on the theme "Development of pedagogical skills and creative abilities" was organized. The Institute psychologist M. Mukhamedova and the curator of the group Z. Khafizova, as well as students of 414 group of education direction "Professional education - land management and land cadastre" took part in the round table.

Mastery is manifested in activity. Pedagogical mastery expresses the teacher's personality as a whole, his experience, civic and professional position. Mastery of a teacher is a synthesis of personal and business qualities and personal qualities, determining high efficiency of pedagogical process. The creative potential of a teacher is formed on the basis of two components: pedagogical professional and social experience.
