

The result of the competition for foreign consultant service

Two professors of US universities took part with proposals in the competition for conducting training sessions of course “Use of fluid power and hydraulic systems of tractors and agricultural machines” which will be organized within framework of the project “Enhancement of agricultural engineering programs by using innovative techniques employed in foreign universities” implemented at the institute. The Consultant selection and recruitment team carefully reviewed received proposals, and Thomas Bon, a professor of North Dakota State University, was selected as a consultant. Classes on the above course are scheduled for July 26-31. To participate the course, please contact technical coordinator of the project, M.Amonov (telegramm number 90 321 3437)
