

## Following Uzbek uniform as a dress code of HEI

Undeniably, the culture of clothing reveals a person's appearance, the spiritual world, aesthetics, moral qualities and potential. Attitudes towards clothing culture are also a factor in expressing views of beauty, elegance and decency. It is worth noting that in today's rapidly developing world era, both the orientation to clothing and the demand for it are changing. It is true that our youth blindly follow fashion, accept new tight-fitting, open, short dresses as fashionable and think that such clothes should be worn. Young people do not even think that these clothes don't suit to our Uzbek culture and mentality. Because today in the streets, our youth, who dress in imitation of Europe are reflecting our nationality. In fact, clothing culture is an integral part of our Uzbek culture. The serious side of this issue is that this emerging problem has become an important urgent problem today.

In this regard, on October 8, 2021, the chairman of the women's council of the institute Zukhra Ismailova, head of the department of spirituality and education Khursandova with students of the Faculty "Agricultural Mechanization" Dilafruz and Nargiza, chairwomen of the women's council of the faculty, held a round table and shared their views and opinions about fashion, modern clothes, culture of modern clothes of our women and girls and Uzbek clothes. Social event was full of interesting and open dialogues, where it was explained that dress was not only beauty for every girl, but also a mark about her morality, worldview, character, level of spirituality and, in general, what kind of personality she is. It was noted that this is one of the indicators.
