

Achievements in science - a factor of progress

The country is consistently implementing measures to form a harmoniously developed generation, spiritual, moral and physical education of youth. In particular, our institute carries out effective work in this direction.

Today, museums serve to educate the young generation in the spirit of love and devotion to their homeland. Museums play a big role in gaining knowledge about the history of our country, acquainting the young generation with the rich spiritual heritage of the people.

3rd course students of the 302th group of the direction “Water Management and Land Reclamation” of the department “Irrigation and Reclamation” under the direction of Associate Professor of the department “Irrigation and Land Reclamation” Adham Mamataliev visited the Tashkent Polytechnic Museum.
