

The Process Automation and Programming Circle was launched

A number of activities are being carried out in the 5 important areas of the initiative put forward by our Head of State. In order to raise the morale of young people and to organize their free time in a meaningful way, a number of activities are carried out at the Institute. At the Department of General Technical Sciences of Karshi branch of TIAME started its work circle "Process Automation and Programming". The main purpose of automation is to improve the quality of process execution. An automated process has more stable characteristics than a process carried out in manual mode. In many cases, process automation increases productivity, reduces process execution time, reduces cost, and increases the accuracy and stability of the operations performed.
