

## the importance of practice in education

During the practical training students consolidate and deepen their theoretical knowledge, master the necessary skills and abilities in their chosen specialty. Students of the 2nd year of the direction of education "Reclamation hydrogeology" together with their supervisors I.Ruziev and K.Eshkuvatov organized educational and familiarization practice in the Research Institute "GIDROINGGEO". Senior researcher of the Institute M. Kholmirzaev introduced the students to the scientific work and practical results of the Institute. M. Zokirov, Head of the Laboratory "Geology of Solid Mineral Deposits" and N. Rakhimov, Senior Researcher of the Department "Geological Monitoring" shared the scientific research carried out at the Institute and familiarized students with modern equipment.
