

## Appreciation and care for the older generation is the duty of everyone

It is worthy to admit that showing deep respect, reverence and care for the representatives of the older generation is the main indicator of the spirituality and high culture of any society. For over periods, all these high moral qualities were inherent to Uzbek people, and from the first years of independence of our country these features became one of the essential priorities of state policy.

The faculty of Theoretical and Structural Mechanics was visited by Godovannikov Alexander Maximilianovich , who worked for many years at the department as an associate professor, and Knyazeva Valentina Stepanovna , who worked as the head of the laboratory for many years. On behalf of the institute authority, the staff of the department congratulated all of them with the holiday and expressed gratitude to veterans of labor for supporting generations of successful people.
