

A look at Timurids History

Probationer of the department «Ecology and water resources management» Sharipjonova Z. with the students in "Water supply engineering systems" of the faculty "Hydromelioration" on September 7, 2019 visited the State Museum of Timurids History.

Students got acquainted with the activities of our ancestor, the great commander Amir Timur throughout his life, in particular, received information about good deeds in the field of education and science, culture and in the military sphere. During the visit, students learned about the Timurids genealogy, various coins of the period, ceramics, military items and palaces, which were built during the Timurids era.
