

In the exhibition hall

Monitoring success and building partnerships based on shared results are mutually beneficial for countries. So, it is a great pleasure to see the effectiveness of the triumphs achieved in foreign countries at the exhibition halls. On the 5 th of October this year students of the 4th stage 8th group of "Land management" faculty visited the international tourism exhibition, which is held at the Uzexpo center.

There students were introduced to the drip irrigation facilities of the People's Republic of China. The roundtable, accompanied by the artists from Khorezm, also has a great impression on them.
