

Do we need a code of spirituality

When a leader pays close attention to spirituality and enlightenment, the team spirit changes. The article titled "Strategy of spirituality and enlightenment", published in the issue of the newspaper "Yangi Uzbekistan" dated October 7, 2021, describes in detail the work done in this direction. It is noteworthy that the author of the article, vice-rector of the institute R. Choriev, proceeding from the strategic policy of Shavkat Mirziyoyev, made a number of proposals to increase the efficiency of spiritual and educational work.

The proposals for the development and systematic implementation of a comprehensive educational, methodological, and innovative educational module "Strategy of the New Uzbekistan" are also of great importance
