

## Startup project of TIQXMMI "Defuse-IT" winner of the WIF 2020 competition

The Ministry of Innovative Development of the Republic of Uzbekistan and Eurasian Engineering Company LLC (EEC Russia) held the first annual international youth innovation forum "World youth innovation forum - 2020" in Uzbekistan. The purpose of holding the first annual international youth innovation forum "World youth innovation forum - 2020" in Uzbekistan is to create conditions for stimulating and activating the sphere of innovations in the Republic by raising funds for the implementation of promising projects, as well as providing expert support for national innovation projects. In particular, the forum will create a permanent platform for interaction between representatives of the state, business and the innovation sphere, which is a center of competence for the joint implementation of projects.

The forum attended by a project of the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, the Department of Automation of Technological Process Control "Defuse-IT" in the direction of agriculture. The project successfully passed two stages, including an expert assessment of international specialists, recognized as the best agricultural project, and received first place with a cash award of 30 million soums. We remind you that Defuse-IT projects aimed at developing a special system and construction for treating water of medium and high salinity for irrigation. This project combines IT technologies and methods of salt-water purification. This technology in future has a beneficial effect on the reclamation state of the soil and increases the fertility of the lands, the project was worked on by the staff of the Department of Automation of Technological Processes and the A&B engineering laboratory, associate professor Usmanov A.M., doctoral student Ozodov E.O. and undergraduate Yusupov M.
