

The role of language in communication and education.

It is true that the resolutions and decrees of the President of the country on the state language last year set a great task. It was no accident that the Prime Minister of Uzbekistan, Abdulla Aripov, paid attention to these issues last night. Video footage criticized the fact that more than 300 villages and neighborhoods across the country, about 400 streets still remain old, Soviet-era or illogical names.

There are many beautiful words in our language! Moreover, it was possible to name reflects the history and climate of each neighborhood. In accordance with the Decree of President Shavkat Mirziyoev on measures to radically improve the prestige of the Uzbek language as a state language dated October 21, 2019, the importance of the issue is also important.

On March 10, the talented students of the faculty "Hydraulic Engineering", "Mechanization of Hydromeliorative Works" and "Agricultural Mechanization" visited the National Television and Radio Company of Uzbekistan and took part in the recording of the show "Language - Balance of Development". Participants asked many questions.
