

## Sculpture of kindness

✘ Mercy is a great bond that connects generations and hearts. Where there is peace and quiet, there will be stability. Looking back on history, it is impossible to remember those struggling for our lives today. The trap of World War II is a sign of deep disappointment in the hearts of all. "Very rarely a country or a nation can be proud of such high human qualities. As time passes, the value and value of this heroism, which Shomakhmudov's family has shown, is growing," said the head of our state, Shavkat Mirziyoev. At a time when bread was being tormented for thousands of years, this kind of generosity increased more than heroism. Those who have a real humanitarian value are worth not only at the Memorial Day, but also every day. Students of the 107th group of Hydromelioration Faculty at the initiative of the group visited the statue of the people's dormitory in honor of the Shomakhmudov family and made a bouquet to the monument. The students once again witnessed the great meaning and content of the great discourse, "The love of the world will save."
