

The 1st International Conference on Problems and Perspectives of Modern Science” (ICPPMS-2021) is being held in Tashkent.

At the initiative of the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, an online conference was organized in collaboration with Sun Moon University, South Korea, Navoi State Pedagogical Institute, Tashkent State Transport Institute and Tashkent Scientific Research Institute of Chemical Technology.

Professor O. Umurzakov, Rector of the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, delivered a speech about the importance of this international conference. He said that it covers the scientific results of leading researchers in various fields of science, including innovative methods in agriculture and water management, advanced chemical technologies, construction of buildings and structures, the use of digital technologies in energy and other fields and will serve as a platform for a wide range of scientific discussions for experts.

Another important aspect is that the conference will develop recommendations for the implementation of the best world practices on the example of Uzbekistan.
