

Training in TIAME

It is well-known that one of the main requirements facing modern experts is the programming and modeling of these natural processes modeling. For this purpose from April 8 to April 11, 2019 in the Innovation Cluster located on the territory of our institute trainings on hydrological modeling program were conducted on SWAT - soil and water assessment tool for hydrology and Water Resource Management.

It was attended by masters and teachers of our Institute, specialists from IWMI and Uzhydromet. The training was conducted by Dr. Lal Mutubatta, a Hydrologist Exper from Sri Lanka . During the training the participants received answers to many questions.

Report by S.Kodirov, an assistant of department of 'Hydrology and Hydrogeology'

R.Jumaniyozov, the press secretary of the institute
