

Research and innovation: meeting with 3rd year students of the Faculty of Energy Supply of Agriculture and Water Resources

Using these two concepts together has become common practice today. At our institute, a number of measures are being taken to further develop the integration of education, research, innovation and promote them to a new level. Consistent work is underway to attract students to the development of the industry and the ability to engage in research work. On September 11, 2019 one of these meetings with 3rd year students of the Faculty of Energy Supply of Agriculture and Water Resources took place with the participation of the head of the department of scientific research, innovation and training of scientific and pedagogical personnel Sh.Imomov and employees for the organization of research work of gifted students. During the meeting, students were given the concept and idea of research activities. Students asked a lot of questions about scientific activity and innovations, to which they received detailed answers.
