

The teachers of our institute are training in Moscow State University of land management

B.M. Usbankulov (From 15.09.2019 to 15.12.2019), A.N. Inamov (From 24.11.2019 to 28.12.2019) and one of the Bukhara branch F.Sh. Khudoyberdiev (01.12.2019 to 31.12.2019) Professor-teachers improve their professional skills in Moscow State Land University.

During the internship, the experience of the departments studied "Geodesy and Geoinformatics", "Cartography", "Land Use and Land Cadastre", "Urban Cadastre" and "Land Management". In particular, the faculty of the institute under the leadership of the head of the Geodesy Laboratory S.V. Kovalev participated in the process of repair and installation of geodetic devices.

In addition, our staff organized an open lesson (seminar-training, master class) on "Using HBS technologies in maintaining the state cadastre in Uzbekistan".

In order to study the elevation system, the island of Futtock first explored and researched at the zero elevation that first installed on the island, which discovered by Peter the Great in the mid-seventeenth century.

In addition, round tables held with a number of scientists and experts from the Pulkova Astronomical Observatory, established in 1839.

He took an active part in the international conference devoted to the 100th anniversary of the faculty of Land Management "Moscow State Land University", which took place on December 10. Vice-rector for International Affairs prof. V.I. Nilipovsky, head of the department of Land Use and Cadastre prof. S.A. Galchenko, Head of the Department of Cartography prof. V.P. Paklov, Head of the Department of Geodesy and Geoinformatics professor V.N. Baranovs held a tour of the University Museum "History of Land Management".

The training is in progress now.
