

Report by future PhD researchers

Research and advancement are wisdom and product of science. This is the rule of the researchers. The relevance and novelty of the topic contributes to science, plays an important role in the development of society. On January 11, 2019, based on the approved "Roadmap" of base doctors trained at Hydromelioration faculty, "Hydraulic and Hydroformatics", "Irrigation and Melioration", "Hydro-Mechanical Systems", "Ecology and Water Resources Management" reports on the results of the research were discussed. In the report, members of the faculty's scientific board gave suggestions and recommendations to the researchers.
