

A master class for professional development listeners

✘ Taking into account the importance of water management in the Republic's economy, training and skills development in this area requires new approaches under modern requirements. Master classes play an important role in providing new information to professionals, listeners, and introducing modern technologies. One such master classes organized at the networking center for retraining and advanced training of teachers.

The master class conducted by Adham Mamataliev, Associate Professor of the Department of Irrigation and Melioration on the theme "Methods and techniques of irrigation." The lecturers of the Network Center on retraining and postgraduate education "Water Management and Reclamation", professors and teachers of the Institute participated in this lesson. This course, with a high level of pedagogical skills, encouraged all participants to be active and full of discussion. The workshop was very successful and the participants acknowledged that they had achieved this goal.

Director of the Network Center of retraining and advanced training of teachers G. Bekmirzaev
