

## At the HUMO ARENA ice complex

✘ Construction of the Ice Palace "Humo Arena" in Tashkent Bunyodkor and many Uzbeks believe that the construction of a closed ice stadium in Tashkent will help the development of winter sports that Uzbekistan has not so far demonstrated in international competitions. To this end, the plan of the visit of the rector of our institute on April 20, 2019 and the dean of the Faculty of "Hydromelioration" on April 20, 2019, to the center of the Islamic civilization of Uzbekistan, "Humo arena" and "Tashkent city" (Tashkent City) On May 11, 2019, in the course of "Hydrology (reservoirs)" direction, the second group visited the Humo Arena, teamed with 217 group coach S.R Mansurov.

The infrastructure of the ice-maker consists of a large ice arena with 12,500 seats, a banquet hall for 200 spectators, three VIP-lounges suitable for dear guests, and 34 for 14 to 22 spectators A VIP-lounge, a restaurant with a premium class at the Ice Arena, a gourmet restaurant and a café, 17 dressing rooms for up-to-date athletes, 3 gyms, 5 grim rooms for cultural representatives, a press center, a conference room, a sports inventory store , fitness and children's playgrounds. In the area around the complex, they received information about a multi-storey parking, a recreational zone for family recreation.

The new multifunctional ice complex is an exclusive project for Uzbekistan and nowadays it has been nominated for the title of the most magnificent sports and cultural center of the city. The students felt that deep study of science during their journey would be a great contribution to their future and development of the country.

Assistant of the department "Hydrology and Hydrogeology" S.R. Mansurov's information
