

## Good conditions and new education are the time

As you know, there are big reforms in all spheres and sectors. In addition, the conditions for students trained at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers are improving day by day. An example of this is recent student housing, which recently renovated and commissioned.

We would like to thank President of the Republic of Uzbekistan Shavkat Mirziyoyev for this. On February 13, 2020, the rector of the Institute Uktam Umurzakov visited our students to study the living conditions of students in the dormitory, to be acquainted with the effectiveness of the opportunities and to talk with students. During the visit, the students familiarized with the activities of the sewing shop and the social services room, which organized on implementing five important initiatives. The students interviewed the tailors and reviewed their work and provided recommendations and suggestions on the opportunities.

Afterwards, the rector of the institute and the students had a conversation. Students invited to the rector's office and asked their questions and suggestions. The proposals accepted and the Vice-Rector for Youth Affairs assigned by the Rector jointly with the relevant departments. Our teacher spoke with students and said that such meetings should last and expressed their opinion that students should take the initiative in studying and gaining knowledge. Earlier, centralized study of student dormitories carried out. February 14 - Centralized study conditions of undergraduates of the Master's Degree in the dormitory. We invite everyone.
