

What does it mean Assalomu Aleykum?

What does it mean Assalomu Aleykum?

Assalomu aleykum, dear friends! The beginning of our conversation did not begin like this. As the owner of a pen, you are the only one who wants to do good, our heart is pleased to share with you the good intentions in this word. Indeed, each nation has its own unique style of greeting.

However, the more we talk about the Eastern greetings, the more intriguing and unique they are. Why do we talk about this, of course? Sometimes, when you look at students in the street, when you see their teachers when you greet them, you may think that they do not know the role of greeting and communication. Greeting not only enhances people's love and affection but also strengthens their friendship. Hands or hugs, greetings, although the distinction between genital affinity and age, sex is an indication of the sincerity and intimacy of communication. Sometimes, "If I say hello, how can anyone not say hello to this, has his eyes bulged and his nose up?" - The sadness and the objections of the tune are also heard. It is good for us to keep in mind these principles of our ancestors. "Assalomu aleykum Allah's duty is that if you greet someone but he does not greet you, you do not need to be offended, the angels receive the greeting.

"Assalomu alaykum" is an Arabic word meaning "I wish you health, peace, and prosperity." The fact that people are friendly and greet each other with the greeting of peace is common to all nations of the world. Although the writing is varied, it is not exaggerated to say that it has a similar meaning. In this context, we remember the phrase "The closest that people have made to their greeting to others." We cannot deny the fact that people greet each other and contribute to the warmth of their relationships. A wise and respectful person should greet his friends and relatives and say, "Hello." The person who rides - the pedestrian, the pedestrian - salutes the seated, the few - the majority, the little ones - the adults. Greetings must be complete, not interrupted, but with good manners. Do you know that the greeting of the word "somalaykum" in the form of "wish you death" has changed the meaning of the word to something completely negative? If you do not know, we hope you will now be more attentive in the greeting and will be accustomed to greeting the Oriental beauty.
