

The importance of practical hours in science

In order to effectively use the created conditions and apply theoretical knowledge in practice, Associate Professor of the Department of Hydrology and Hydrogeology F.A. Gapparov and assistant of the department Eshkuvatov K.Sh. conducted research on Kuksaroy reservoir of the Khatyrchinsky district of the Navoi region.

During the study, a number of existing problems in the reservoir were studied and the necessary conclusions were drawn. During the study, F.A. Gapparov introduced the young specialist Eshkuvatov K.Sh. a list of problems associated with reservoirs, as well as ways to solve them on the example of the Kuksaroy reservoir.
