

Scientific research aimed at innovative inventions

Our institute continues the campaign to attract students to scientific and creative work. On September 13, 2019, at 10 a meeting of employees of the department of scientific research, innovations and training of scientific-pedagogical staff, the department of commercialization of scientific and innovative developments, the department of research work of gifted students with 1st and 3rd year students of the faculty of mechanization of hydromeliorative works.

The meeting turned into a sincere conversation. Teachers answered all students' questions, giving examples from their own life. Also, it was mentioned that a group was created in the Telegram (scientific department https://t.me/tiqxmmi_ilmiy_innovation). We invite all students and teachers to cooperate.
