

## An innovative demo lesson

On October 13, 2021, for students of group 407 of "Innovative technologies and their use in water management" direction of the Faculty of Hydromelioration, the teacher of the department O. Sattorov conducted an open lesson on the subject "Economics of water management and management." An open lesson was held on the topic "Prices, Profit and Production Profitability". The lesson used the "blitz-survey" method, modern pedagogical technologies.
