

In the museum of the history of Temurids

1st year students of group 105 of the direction "Engineering water supply systems" of the Faculty of Hydromelioration under the guidance of the group curator Akhmedzhanova G.T. visited the Museum of the History of the Temurids. There is an impressive large panel in the style of miniature called "Great Temur - the great creator". The picture reflects the life of Amir Temur from his birth to death. From the first days of its existence, the museum has become the center of scientific thought and educational work. The exhibits of the museum are of great historical value. During a visit to the museum, students asked and received answers to all their questions.
