

## TIAME students' visit to Tashkent Agricultural Machinery Plant

Uzavtosanoat has developed a number of strategies and programs to optimize production and corporate governance at the Tashkent Agricultural Machinery Plant. The first-year students of TTTEM of the faculty "Energy supply of agriculture and water resources" of our institute visited the Tashkent Agricultural Machinery Plant for This acquaintance internship.

Under the guidance of practice leaders M. Begmatov, O. Nazarov and A. Mustafakulov, students got acquainted with the production process, where they received answers to their questions from officials of the plant. It is no exaggeration to say that such visits instill in the minds of our students an immunity to production.
